

# 5 Rules that Assure Excellent Soft Tissue Contour For Single Tooth Implant in The Aesthetic Zone

Building the Emergence Profile

## Overview

This lecture will discuss the five rules that dictate the long term success of single tooth implant in the aesthetic zone. The presentation will also focus on how to build an ideal soft profile using immediate provisional restoration.

## At the end of this lecture the attendee should be:

- Familiar with the criteria for successful single tooth implant treatment in the aesthetic zone.
- Familiar with how to fabricate an ideal provisional crown around a single tooth implant.
- Familiar with the impression technique that will transfer the position of the soft tissue to the lab.
